## **Books for Military-Connected Students**

These books incorporate topics and themes related to the experiences of militaryconnected children, including mobility and PCSing, parental deployment, dealing with difficult emotions, parental injury or death, reunion, PTSD, and military culture.<sup>1</sup> Although the Clearinghouse for Military Family Readiness has not vetted each book individually, you may find it useful to incorporate some of them into your lesson plans as a way to educate non-military students about military experiences, open up dialogue with military students, or incorporate military culture in your classroom. Many of these books are appropriate for elementary school students, but others are geared for older readers.

## Books for Military-Connected Students Lexile Scores Assigned

These books incorporate topics and themes related to the experiences of militaryconnected children, including mobility and PCSing, parental deployment, dealing with difficult emotions, parental injury or death, reunion, PTSD, and military culture.<sup>2</sup> Although the Clearinghouse for Military Family Readiness has not vetted each book individually, you may find it useful to incorporate some of them into your lesson plans as a way to educate non-military students about military experiences, open up dialogue with military students, or incorporate military culture in your classroom. These books are associated with specific Lexile measures, which can be used to match students to books with the right level of challenge. If you need assistance interpreting the Lexile measures, visit www.lexile.com.
