Organization
The Coast Guard is comprised of an Active and Reserve component and uses a variety of platforms.

- **Aircraft**
  - Fixed-wing aircraft operate from large and small Air Stations. Rotary wing aircraft operate from flight-deck equipped Cutters, Air Stations and Air Facilities.

- **Boats**
  - All vessels under 65 feet in length are classified as boats and usually operate near shore and on inland waterways. Craft include: Motor Lifeboats; Motor Surf Boats; Large Utility Boats; Surf Rescue Boats; Port Security Boats; Aids to Navigation Boats; and a variety of smaller, non-standard boats including Rigid Inflatable Boats.

- **Cutters**
  - A "Cutter" is any Coast Guard vessel 65 feet in length or greater, having adequate accommodations for crew to live on board. Larger cutters (over 179 feet in length) are under control of Area Commands (Atlantic Area or Pacific Area). Cutters at or under 175 feet in length come under control of District Commands.
